A GREENER, STRONGER INDIA: PM'S STRATEGIC VISION FOR INDIA AS A GLOBAL MOBILITY HUB

Bharat Mobility Global Expo 2025 (BMGE 2025), scheduled from 17 to 22 January, had a star-studded opening by Honorable PM Shri. Narendra Modi, in the presence of several other Ministers and key dignitaries. The event reflects the vision of our PM, whose leadership and vision have been instrumental in transforming India into a key player in the global mobility sector.

Addressing the doyens of the automotive and auto component industry during the inauguration of BMGE 2025 at Bharat Mandapam, Modi emphasized India's ambition to become a developed nation by 2070, with the mobility sector playing a pivotal role in achieving this goal. He outlined how the sector, through innovation, sustainability, and the promotion of clean energy, is aligned with the broader goals of the country's development.

"The Bharat Mobility Global Expo serves as a testament to the speed and scale of progress within our nation. It is a perfect example of the 'Atmanirbhar Bharat' (Self-Reliant India) initiative," stated Modi, highlighting the role of the automotive industry in driving India's economic growth.

India's Growing Role in Global Mobility

India has become the third-largest passenger vehicle market globally. The Prime Minister expressed pride in this achievement, underscoring the country's leadership in the automotive sector. The exponential growth of India's automobile industry is driven by factors such as urbanization, increasing disposable income, and the country's robust infrastructure development.

He also highlighted the government's commitment to environmental sustainability, citing the National Green Hydrogen Mission as a major step towards achieving cleaner energy solutions. India's

strides in electric vehicles (EVs) and sustainable mobility are not just beneficial for the economy but are also aligned with the government's broader environmental goals.

Focus on Clean and Green Mobility

Prime Minister Modi outlined India's vision for clean mobility, where electric vehicles, hydrogen fuel, and biofuels are set to play a significant role. The government is also focused on reducing the nation's reliance on fossil fuels and lowering carbon emissions. His commitment to promoting green technology aligns with the growing global demand for sustainable solutions, positioning India as a leader in clean transportation.

"The future of mobility in India is driven by the vision of sustainability, innovation, and the transformation of our infrastructure," he noted. Under his leadership, India's automotive industry is making strides toward a greener, more efficient future.

India's Future as a Mobility Hub

With the significant growth in India's automotive sector and the increasing demand for clean and green mobility solutions, PM Modi is confident that India will lead the way in global mobility. "As the world's most youthful country, India's demographic advantages are a powerful driver for the future of the automotive industry," he said, stressing that India's growing middle class and youth population will create unprecedented demand for mobility solutions.

> *"Through this Expo, we are showing the world that India is not only a manufacturing hub but also a beacon for innovation and sustainability in the mobility sector."*

India's future as a global mobility leader looks promising, driven by sustainable technologies, green energy, and the government's support for innovation and infrastructure. BMGE 2025 stands as a clear reflection of the country's ongoing transformation and ambition.

Largest-ever Components Show Kicks-Off at Yashobhoomi, Dwarka

The Bharat Mobility Global Expo (BMGE) 2025 – The Components Show at Yashobhoomi, Dwarka, New Delhi, had an official kick-off and ribbon-cutting on the evening of 17th January, in the presence of Piyush Goyal, Minister of Commerce & Industry; Jitin Prasada, Minister of State, Commerce & Industries and Electronics & IT; Sanjiv Puri, CII President; Pankaj Chaddha, EEPC Chairman; Shradha Suri Marwah, ACMA President; Vikrampati Singhania, ACMA Vice President; and Vinnie Mehta, Director General, ACMA.

A Tribute to Industry Pioneers

Shraddha Suri Marwah began by paying tribute to two iconic figures, Mr. O. Suzuki and Mr. Ratan Tata, whose visionary leadership has been instrumental in shaping India's automotive landscape. "Their unwavering belief in India's potential laid the foundation for the thriving automotive sector we see today," Marwah remarked.

Celebrating Growth and Resilience

Marwah highlighted the industry's transformation and its ability to adapt to a changing world. "This edition of the Bharat Mobility is taking place against the backdrop of our industry's most defining transformation," she noted. The event, the largest ever, featured over 1,000 exhibitors and demonstrated India's global competitiveness in the auto components sector.

India's Auto Sector: A Global Force

Shri. Piyush Goyal echoed similar optimism, underlining the importance of the auto component sector in India's journey towards becoming a developed economy by 2047. "Viksit Bharat 2047 is not just a dream. It is the collective commitment of 1.4 billion Indians," Goyal emphasized. He also reiterated the ambitious goals for the sector, aiming to increase auto component exports from $20 billion to $100 billion by the end of the decade.

Innovation and Future Growth

Both leaders emphasized the importance of innovation, particularly in electric vehicles. "Electric vehicles are simpler to produce and economically viable. We must leverage economies of scale to capture global markets," Goyal stated, reflecting the sector's push for sustainable and future-ready technologies.

The occasion also saw the release of the Official Show Directory and the Buyers Guide.

Tata Motors
Drives Innovation with 50+ Next-Gen Vehicles

At the BMGE 2025, at Bharat Mandapam, Tata Motors showcased a diverse range of vehicles and solutions, highlighting their commitment to sustainable mobility. Notable exhibits included the all-new Tata Ace Pro, an advanced electric pickup, and the Prima E.55S, a battery-electric prime mover. The company also unveiled the Prima H.28, a hydrogen-powered truck, and the Ultra E.12, an emission-free urban freight solution. Additionally, Tata Motors displayed a series of cutting-edge passenger vehicles, including the Harrier.ev, Avinya X, and the all-new Tata Sierra, all emphasizing advanced technology, sustainability, and future-ready designs.

Speaking about Tata Motors' expansive display of future ready vehicles, advanced concepts and intelligent solutions, N Chandrasekaran, Executive Chairman, Tata Sons and Chairman, Tata Motors said: "For eight decades, Tata Motors has been at the forefront of shaping the future of mobility, pioneering advancements in safety, design, connectivity, and sustainability. Our relentless pursuit of excellence is fueled by a deep commitment to creating value for customers, communities, and our nation. The rapid shift toward green energy and mobility, an irreversible global megatrend, has made the need for clean, zero-emission vehicles more urgent than ever. We are leading this revolution in India with smart, holistic solutions delivering exceptional performance, reliability, and convenience. Our customers have ready access to an expansive range of cleaner, greener mobility options for both personal and commercial use."

Girish Wagh, Executive Director, Tata Motors, said: "Today marks a defining moment in Tata Motors Commercial Vehicles' journey as we introduce our new mantra, 'Better Always', embodying our unwavering dedication to driving growth and success, for our customers and for our nation. At the Expo, we are unveiling a bold new era in mobility, showcasing 14 smart vehicles, all integrated with ADAS, alongside 6 cutting-edge intelligent solutions that provide real-time performance insights, and 4 advanced aggregates. Accelerating our aspiration towards a greener future, we are presenting 6 zero-emission electric vehicles, ranging from mini trucks and pickups to intermediate and heavy trucks, alongside buses designed for comfortable, long-distance travel."

Eicher *Forays into SCV Segment with 'Pro X' Range*

Eicher Trucks and Buses, a division of VE Commercial Vehicles, has announced the launch of its electric-first range of Small Commercial Vehicles (SCVs), the Eicher Pro X Range, at the BMGE 2025. The launch represents Eicher's strategic entry into the rapidly growing 2-3.5T segment, further emphasizing the company's commitment to advancing India's growth agenda through the transformation of last-mile logistics.

Speaking at the launch, Vinod Aggarwal, MD & CEO, VECV, said, "We have leveraged our legacy of market leadership in Light and Medium Duty Trucks and our track record of innovation to create this best-in-class range of vehicles. Co-developed with customers to meet their specific needs, the Eicher Pro X charts a new path into the Small Commercial Vehicle segment. It is an embodiment of Eicher's brand philosophy, 'Nayi Soch, Naye Raaste.' As India progresses on its 'Viksit Bharat' journey, the SCV segment will play a vital role and the Eicher Pro X will drive transformation in last-mile logistics."

SS Gill, Chief Commercial Officer, VE Commercial Vehicles, shared, "The Eicher Pro X Range has been co-created with leading logistics players and drivers, and is meticulously engineered to meet the dynamic demands of applications such as e-commerce, FMCG, parcel & courier and cold chain logistics. It has given us the opportunity to combine cutting-edge technology with customer-centric solutions such as largest cargo loading space, best-in-class range and energy efficiency, longest service intervals, and host of safety and comfort features for the drivers. This Eicher Pro X series of small trucks is tailored for segment-specific requirements, come fully connected with real-time fleet management & uptime support solutions, for addressing unmet needs of the category as well as maximising profitability for our customers."

Bharat Mobility GLOBAL EXPO 2025

Driving Sustainability and Innovation thru Govt-Industry Collaboration

The inauguration of the Bharat Mobility Global Expo (BMGE) 2025 at Bharat Mandapam also saw Ministers Piyush Goyal, Nitin Gadkari and HD Kumaraswamy provide valuable insights into India's mobility ecosystem and its future.

Shri Piyush Goyal's Address on the Future of Mobility

Shri Piyush Goyal, Union Minister for Commerce and Industry, highlighted the rapid growth of the Indian automotive sector. He noted that India's automotive industry is now one of the largest in the world, driven by government initiatives like the Production Linked Incentive (PLI) Scheme, which has incentivized the manufacturing of clean vehicles and sustainable technologies. The event, he said, was a perfect showcase for India's capabilities in producing world-class mobility solutions.

"It is a testament to the progress we have made that the Bharat Mobility Global Expo has become a significant global event," said Shri Goyal, emphasizing the positive growth trajectory in India's mobility sector. He also underscored the importance of sustainable technologies, such as electric vehicles (EVs), which play a crucial role in reducing emissions and driving India's future economic growth.

Shri Nitin Gadkari's Focus on Sustainability and Innovation

Shri Nitin Gadkari, Union Minister for Road Transport and Highways, expressed his enthusiasm for the growing emphasis on sustainable mobility solutions in India. "India's mobility sector is undergoing a remarkable transformation, with innovation and sustainability at its core," he said. Gadkari highlighted India's achievements in electric mobility and the significant strides made in battery technology, which are vital for achieving the country's environmental goals.

Gadkari also focused on the government's policies that are facilitating the development of clean transportation options, from electric vehicles to cleaner fuels. He praised the Bharat Mobility Global Expo for serving as a critical platform to showcase these advancements.

Shri HD Kumaraswamy on Clean Transportation Solutions

Shri HD Kumaraswamy, Union Minister for Heavy Industries and Steel, addressed the importance of clean transportation solutions in India's fight against climate change. "Sustainable transportation solutions are crucial for our environment and the well-being of our citizens," he stated, emphasizing the role of the automotive industry in reducing greenhouse gas emissions.

Kumaraswamy noted the collaboration between various sectors, including government bodies, industry stakeholders, and associations, to promote sustainable and innovative mobility solutions. He further highlighted India's growing role in the global supply chain for automotive and mobility solutions.

Growth of Electric Mobility in India

The Expo also brought attention to the tremendous growth in electric mobility, with several key industry leaders discussing the rapid adoption of electric vehicles in India. The country has witnessed a massive increase in EV sales over the past decade, with sales growing by over 600-fold. This surge is indicative of the shifting demand toward clean mobility solutions, driven by both government policies and consumer preferences.

The government's focus on EV infrastructure, including charging stations and incentives for both manufacturers and consumers, has helped foster this growth. Several prominent companies showcased their latest electric vehicle models and innovations in battery technology at the Expo.

A Collaborative Approach to Clean Mobility

The event also underscored the importance of collaboration between various stakeholders to drive the adoption of clean transportation solutions. From automakers to tech companies and government bodies, the Expo demonstrated how different sectors are working together to create a cleaner, more efficient future for mobility.

As the Expo continues, it is clear that India's automotive and mobility industries are at the forefront of innovation, sustainability, and growth. With the government's support and a collective commitment to progress, the future of mobility in India is brighter than ever.

Unifying Mobility:

BGME 2025 Showcases India's Prowess Across Auto, Construction, Urban Mobility, and Beyond

In an exclusive interview with MOTORINDIA, Pankaj Chadha, Chairman, EEPC India, shares exciting insights about the second edition of the Bharat Mobility Global Expo, scheduled from January 17-22, 2025. Building on the success of its inaugural event, the Expo is expected to attract over 500,000 visitors and feature a diverse range of mobility solutions, from auto and components to construction equipment and bicycles.

What inspired the integration of diverse mobility sectors under one platform at Bharat Mobility Global Expo 2025, and what advantages does this unified approach bring?

Mobility connects everything, from construction equipment to cycles. By bringing all mobility-related sectors under one platform, including the Urban Mobility and Infrastructure Show, Battery Show, Construction Equipment Expo, Steel Pavilion, Tyre Show, and Cycle Show, we offer a comprehensive view of India's advancements in mobility. This unified approach not only enhances visibility and publicity but also encourages cross-industry exploration. Visitors attending the Auto Show, for instance, can discover innovations in bicycles, batteries, tractors, and construction equipment, creating a synergistic boost in footfall and opportunities for exhibitors. Operating collectively delivers far greater impact than working in silos.

We are expecting over 5 lakh visitors this year which is significantly higher than last time. There have been concerns about whether the venues — Bharat Mandapam, Yashobhoomi at Dwarka, and India Expo Mart — can handle this scale. What are your thoughts?

Bharat Mandapam, which hosted the G20 Summit, and Pragati Maidan have undergone revamps and are well-equipped to host events of this scale. Yashobhoomi is a new and impressive venue, while India Expo Mart has a proven track record. Each venue hosts specific shows, distributing the footfall effectively. We are confident these venues can manage the influx of visitors and exhibitors seamlessly.

You mentioned a waiting list for participation, especially in the Auto Components Show. Are other concurrent shows witnessing similar interest? And how do you view the maturity of OEMs and component manufacturers in bringing innovations to these events year after year?

Yes, there's strong interest across all shows, reflecting the industry's dynamism. With rapid advancements in e-mobility and technology, manufacturers consistently have new innovations to showcase.

What is your vision for Bharat Mobility Global Expo in the coming years? Will it remain an annual event?

Annual or biennial frequency depends on industry needs, but the fast-paced evolution of mobility solutions justifies regular exhibitions. While the final decision rests with the Ministry, it's shaping up to be an annual event. With India emerging as a global hub for mobility solutions, the Expo will continue to grow, reflecting the increasing interest and opportunities in the sector.

As EEPC India focuses on exports, what are your expectations from the Auto and Component Shows in enhancing India's export capabilities?

Auto components account for 14–15% of India's engineering exports. Greater traction in this sector directly boosts exports. Automobile, tractor, and bicycle manufacturers—many of whom are EEPC members—are expanding their global footprint. Improved technologies and visibility from these shows will undoubtedly drive export growth, benefitting the entire ecosystem.

ecos

A paradigm shift in temperature-sensitive goods transportation

pbx

A reliable, high efficient, e-mobility ready transport refrigeration solution for electric driven LCVs for electrified temperature-controlled transport of goods crafting a smarter planet.

The requirements for highest reliability of temperature and humidity control function for temperature controlled distribution, transporting sensible and vital supplies - such as pharmaceutical products and foodstuffs drive the design of the pbx solution. Highest efficiency and assurance of long-term compliance with current and future regulations ensures the lowest total costs of ownership.

An affordable, sustainable and smart transport system solution with minimised complexity, low refrigerant charge, full refrigeration capacity control and hermetic solutions is our way forward.

Lowest direct & indirect CO2 emissions with low noise levels enables the delivery in the low-emission urban delivery zones. No dependency on engine speed ensures highest temperature control quality. Highest volumetric efficiency maximises the payload of the electric light commercial vehicles.

CLIMATE MATTERS

Natural refrigerants are the most effective way for a resilient climate and environmentally sustainable transport refrigeration

01 Natural Refrigerant R290 with negligible GWP

02 Future Proof: long-term compliance with current and future regulations such as F-Gas

03 Lowest weight on the markt maximising vehicle payload

04 Ready for your electric fleet with outstanding efficiency

05 Low noise emissions enables night deliveries

06 **On your Mobile Phone**
Set box temperature and control the unit on your own device. Monitor the temperature and choose your personalised alarms. Analyse data direct on your mobile phone, create your own dashboard panels.

Entirely electric
designed for electric vehicles with outstanding efficiency for more driving range.

Utterly hermetic
low refrigerant charge in a hermetic refrigeration circuit for safe and reliable operations.

Fully digitalised
IOT - enabled system with a full data integration for operational excellence.

0 CO2 Emissions
Natural refrigerant with negligible GWP in a hermetically sealed circuit

15% more payload
lowest weight on the market for same cooling capacity

25% higher efficiency
an electric architecture adds to the highest volumetric efficiency

75% less installation efforts
the plug and cool compact system can be easily installed without any refrigeration knowledge required

Summary Main USP´s

- **Designed for Electromobility**
- **Lightest System in the market -> 40kg**
- **Plug & Play System -> installation time between 1 or max. 3 hours**
- **Ready to Run -> fully tested and charged with regfrigerant**
- **Maintenance free- does not require refrigeration knowledge –>in case of repair every workshop can cover**
- **No Generator needed – no belt driven system -> direct conncetion to the 12V Board net or E-PTO**
- **No Extra Batterie needed -> max 7% Energy Consumpition from Traction Battery per Working Day**
- **Real full Electric System**
- **Approved by all OEM´s (Ford, Stellantis, Renault, IVECO, Mercedes, MAN, Volkswagen, Maxxus, BYD, Hyundai, KIA)**
- **Not restriction or Limits in case of the refrigerant (not effectet by F-Gases regulations)**
- **Real Co2 free refrigrerant (R290=GWP of <1)**
- **Full Digital System compared to E-Mobility (Can-Bus Connection, Wifi, Bluetooth, IOT Interface, E-PTO ready)**
- **4-year warranty on the entire system**

Our product platform **ecos** is tailored to the needs of the fleet owners of light commercial 3.5t vehicles enabling the shipping of temperature-sensitive goods in **a reliable, clean and efficient way**

TEXSPIN® to make Monumental Game-Changing Announcement

Since its founding in 1961, TEXSPIN has become a pivotal player in the automotive industry, known for its innovative solutions and engineering prowess. Now, the company is on the brink of a monumental announcement that could reshape its future.

In a recent exclusive interview, Dipen Makwana, Managing Director of TEXSPIN Bearings Ltd., hinted at a significant forthcoming announcement. “This isn’t just about a new product or breakthrough technology,” he stated. “This is about crafting a legacy — a moment that will define TEXSPIN for generations to come.”

While details remain undisclosed, speculations range from mergers and acquisitions to an IPO or a revolutionary partnership. Whatever the nature of the announcement, it promises to be a defining milestone in TEXSPIN’s distinguished history.

TEXSPIN has long been a beacon of innovation, fostering excellence and inspiring industry-wide admiration. Mr. Makwana emphasized, “What we’re about to reveal is not just another chapter in our journey. It’s a bold new direction, a defining moment that the industry and our future generations will look back on with pride.”

As anticipation builds, the automotive and engineering sectors eagerly await the official reveal. Will it be a strategic expansion, a groundbreaking technological advance, or a visionary corporate move? The answers are forthcoming, and the excitement is palpable as TEXSPIN prepares to unveil its transformative plan.

KLÜBER LUBRICATION

Specialized and Custom Lubricants on display

Klüber Lubrication, a global leader in specialty lubricants, is set to exhibit its state-of-the-art solutions at the Bharat Mobility Global Expo 2025, at Yashobhoomi – IICC, New Delhi. The company’s booth, located in Hall 2 #N20, will showcase a range of advanced products designed to enhance automotive component performance and reliability. These innovations are set to reduce downtime, improve efficiency, and support the transition to a more sustainable future. By offering a comprehensive range of innovative lubricants, Klüber Lubrication continues to drive excellence and sustainability in the automotive industry.

Empowering India’s Automotive Future with “Make in India”

Klüber Lubrication India proudly supports the “Make in India” initiative, strengthening local manufacturing capabilities and addressing the unique demands of the Indian automotive sector. Its advanced manufacturing facilities maintain the highest global quality standards, integrating cutting-edge technologies to meet local and international needs.

“Our mission at Klüber Lubrication is to create products that align with our customer’s needs while contributing to India’s economic growth. By manufacturing in India, it allows us to reduce lead times, lower costs, and strengthen partnerships with local suppliers. ‘Make in India’ is more than a slogan for us—it is a core principle that drives us to empower local resources, foster self-reliance, and uphold our global commitment to quality and innovation” said Hitendra Bhargava, CEO and Regional Management Board Member Asia Pacific, Klüber Lubrication.

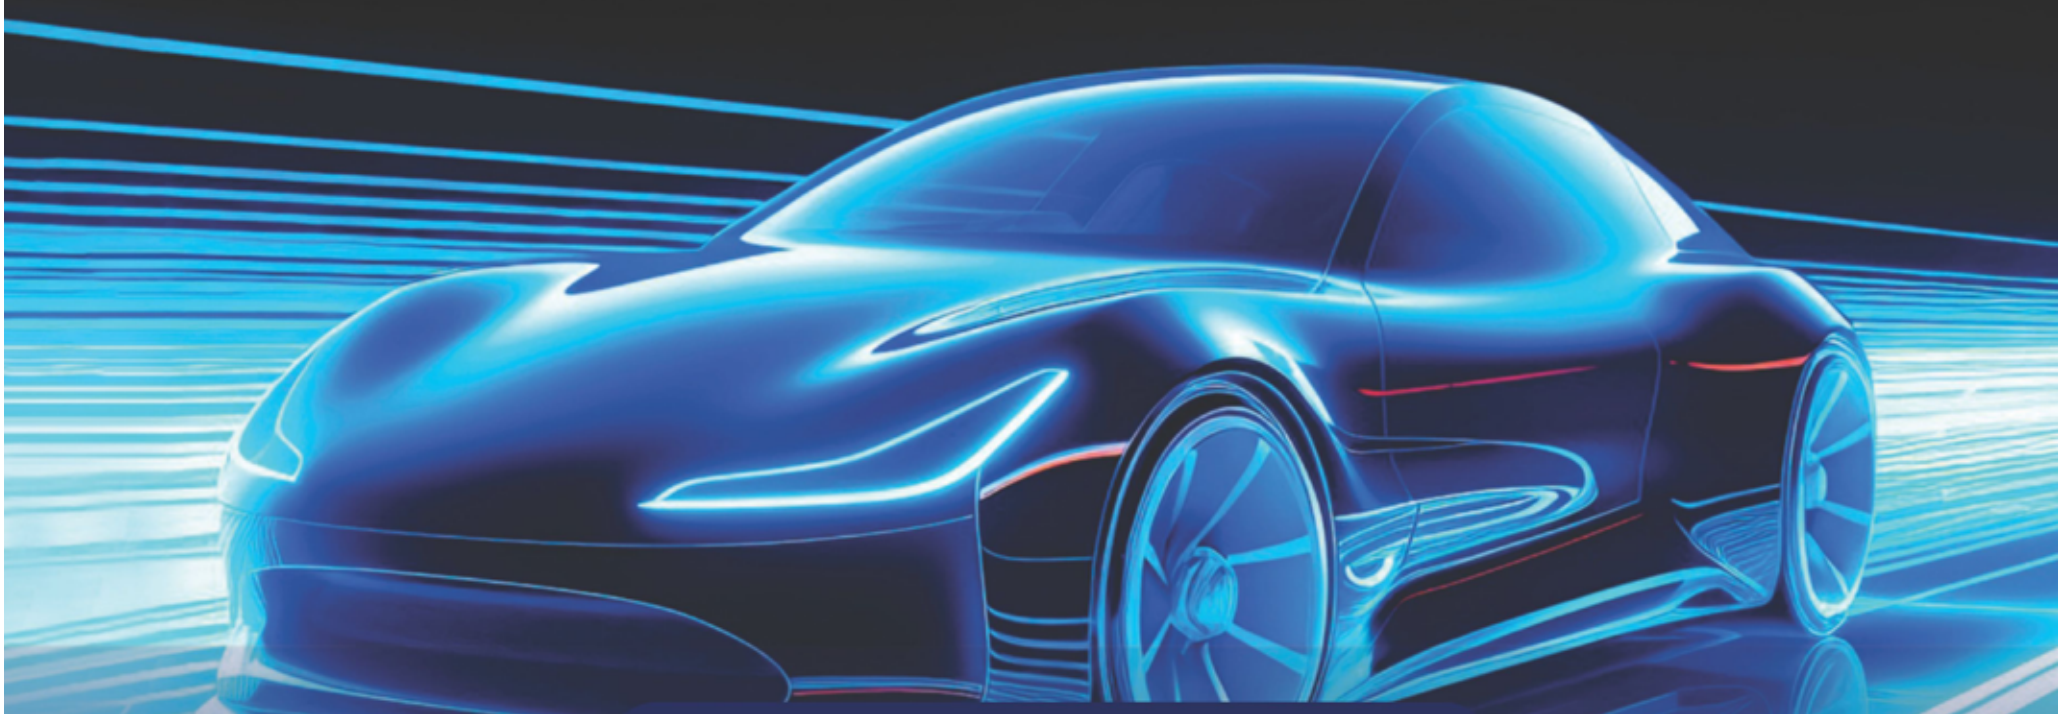
EXCELITE

DH Lighting, India

Illuminate the Future with DH Lighting

At DH Lighting, we specialize in delivering state-of-the-art lighting solutions for OEMs. Whether it's passenger, commercial or industrial vehicle applications, our products combine innovation, precision, and performance to meet the highest standards.



OUR PRODUCT RANGE INCLUDES:

Halogen Bulbs

Reliable and efficient lighting for various applications.

LED Modules

Energy-efficient, durable, and high-performance lighting technology.

Ambient Lighting Solutions

Enhance the mood with customizable lighting solutions.

Software Integration

Seamless control and customization for advanced lighting systems.

DRIVE WITH LOW BEAM

B-90/E, Type B, HSIIDC Industrial Estate, Sector – 31, Faridabad – 121001, Haryana

0129 – 4082806
